ECONNECT WIRELESS CONTROL SYSTEM

**WELCOME TO
OUR FIRST
AGENCY
NEWSLETTER!**

OUR GOAL IS NOT TO OVERWHELM YOU WITH FACTS & FIGURES, BUT TO PUT IDEAS IN YOUR MIND THAT WILL HELP ANSWER THE AGE-OLD QUESTION OF: "WHAT PRODUCT DO YOU HAVE FOR....?"

"I THOUGHT THE FIRST NEWSLETTER SHOULD CONTAIN SOME OF THE BASIC SIZING GUIDELINES THAT WE HAVE BEEN USING FOR YEARS"

RAY MCPHERSON

COMFORT HEAT SIZING GUIDELINES

For a room with adequate insulation (3" in walls, 6" in ceilings) and not a lot of windows, use **10W/ Sq. Ft**

UFOALF C15 PRODUCT

THERMOLECNew Mini Make Up Air

TUTCO

New In-Line Heating System

This guide will work with radiant heat as well as baseboard, fan forced wall heaters and unit heaters up to 10' ceilings.

As always, feel free to call or email our office if conditions differ from standard.

THERMOSTATS

The new line voltage, digital thermostats are always better than the old 'snap action' variety because they will keep a room temperature within 1 degree of set point vs. 2-1/2 to 5 degrees with the old snap action models.

Thermostat selection varies with voltage and is dictated by the amp draw of the heating load

* **120,208** and **277V**, 1 phase use **S.P.S.T.**
(single pole, single throw)

(Any SPST line voltage thermostat that is rated for 'pilot duty' can be used to control low voltage relays)

* **240V**, 1
phase will
normally
require
D.P.S.T.
(double pole, single
throw, with a positive
off)
