## Infrared / Radiant Heater Questionnaire

Name: \_\_\_\_\_ Company: \_\_\_\_\_

Phone: \_\_\_\_\_ E-mail: \_\_\_\_\_

Job name & location: \_\_\_\_\_

In order to determine the type, size, and output of the infrared heaters that will properly heat the space we will need the following information:

**1) Please provide a dimensioned drawing of the area that includes:**

- Available mounting heights and locations
- Any restrictions or special considerations that can affect mounting?

*Example: racks, shelving, lighting, machines, forklift traffic, sprinkler systems, etc.*

**2) Will this heater be used (select one):**

- Indoors                       Outdoors\*                       Indoor/Outdoor\*

\* If the area is outdoors, is the area enclosed/covered?                       Yes                       No

**3) Please specify the use for this application:**

- Residential                       Commercial

**4) Preferred voltage & phase:** \_\_\_\_\_

**5) Elements preference (select one):**

- Metal Sheath: *Indoor only, stands up well to vibration and impact*
- Quartz Tube: *Indoor or Outdoor, Stands up well against splashing, medium resistance to vibration and impact*
- Quartz Lamp: *Indoor or Outdoor, Stands up well against splashing, negligible wind effect low resistance to vibration and impact*

**6) What is the area to be heated's worst case ambient temperature?** \_\_\_\_\_

**7) What is the area to be heated's desired temperature?** \_\_\_\_\_

**8) Preferred type of heat:**

- Spot heat                       Area heat

**9) Preferred control:**

- Wall mount variable                       Hand held variable                       On/Off switch
- Thermostat                       Other \_\_\_\_\_

**10) Anything else we should know?**
