- ~Occupancy & Temperature Monitoring

NEW PRODUCT

Heating Solutions Group

Introducing the VAV FLIPPABLE HEATER

The **Tutco VAV Flippable Heater** can be rotated to fit the requirements and location of the HVAC system. ETL listed, the heater may be used as a stand-alone duct heater or it can be mounted directly to a VAV single duct valve system, within 20" of the valve. The symmetrical heater also offers lower standard heater wire watt density and higher duct to heat coverage. More high and low kilowatt options are available in all sizes, along with additional multi-stage three phase heaters.

DANFOSS solves the problems that ICE & SNOW create

- ➡ RX ROOF & GUTTER
- ➡ PX PIPE PROTECTION
- ➡ GX SNOW MELTING
- ➡ TX FLOOR & THERMAL HEATING

Green

We have always known that **AIR CURTAINS** help to save energy, but now **AMCA** (Air Movement and Control Association International, Inc.) has enacted a provision to the 2015 version of the international energy conservation code supporting that belief. The IECC provision compliments a similar provision adopted by the 2012 International Green Construction code.
